ANTI-FOG GOGGLE WITH ADJUSTABLE VENTILATION SYSTEM (AVS)™

PRODUCT DESCRIPTION

By virtually eliminating lens fogging. The ESS Influx™ goggle allows users to maintain full situational awareness in dynamic environments. As part of the goggle's patented Adjustable Ventilation System™ (AVS™), the Influx RotoClip™ silently pivots the position of the lens inside the goggle frame: choose either a dust-free, fully-sealed mode, or a fog-free, open-ventilation mode. With Influx™ users can always see clearly and act fast when seconds count.

In addition to controlling the AVS™, the Rotoclip™ enables users to switch between lens tints with speed and ease, accelerating environmental adaptability and shortening down time. Combined with a host of other significant advancements, the Influx™ stands ready to cut through the fog of war and help clear a path to victory.

BALLISTIC PROTECTION STANDARDS

The Influx™ Goggle exceeds U.S. MIL SPEC MIL-PRF-32432, ANSI Z87.1 – 2010, OSHA & CE EN166

FRAME & LENS OPTIONS

Frame Color	Lens Tint	VLT*
